

# **DPCHIP**

## **DIESEL POWER**

Plug-in Power for all EFI Diesel Engines.  
Cars, 4WD's, Light Commercials, Trucks,  
Agricultural Equipment and Marine.

Now with new vehicle engine  
and driveline warranty!

- More Power - More Torque where you need it.
- Eliminate flat spots, towing and overtaking a breeze.
- 'Plug & Play' or wire-in modules available. No dismantling or modifying of ECU.
- Self install or at one of our nationwide distributors while you wait.
- Developed and tested in Australia for Australian conditions and fuel quality.
- World's largest range of diesel tuning modules, over 1200 vehicles supported.

**5 Year Warranty.**

**Up to 35% More Power and Torque!**

**Up to 10% Better Fuel Economy!**

## What is a DPChip?

The Diesel Power Chip - DPChip - is an interactive computer which exploits the full potential of modern EFI diesel engines. Individual programming and re-mapping of the engine management system enables this simple-to-fit device to **increase power and torque by up to 35%**.

## How does it work?

The DPChip works by the clever interplay of engine parameters, altering fuel, timing and air characteristics to create smooth power gains. Accelerator, airmass and load readings are accurately used by the DPChip to calculate and deliver the alterations to the engines own signals with digital precision and speed. All error detection systems and operational safety systems remain intact. The DPChip cannot harm the vehicles ECU.

More power is delivered throughout the rpm range. Power is delivered lower down and this produces a more progressive power gain without sudden surges or drop-offs.

Torque (pulling power) is delivered lower down and lasts much longer throughout the rpm range, this makes the DPChip ideal for any number of applications including 4WD driving, towing, carrying heavy loads or just a great drive.

The DPChip is truly unique in that it can be further tuned. The DPChip allows a simple adjustment providing optimum performance for your vehicle - optimum performance also means optimum fuel

economy. The DPChip can provide up to 10% better fuel economy (even on automatics). This is achieved by more efficient and less gear changing.

The DPChip is designed to increase the engine performance well within set tolerances, thus protecting your engine. If you modify your engine with extras such as turbos, intercoolers, and exhausts, the DPChip can also be safely adjusted to enhance your driving pleasure even further.

## Easy to Fit

The DPChip has been designed so that a person with competent DIY skills should have no problems fitting it. In most cases DPChip comes with original adapter plugs so it can be installed easily and quickly. DPChip can be just as easily removed if your vehicle goes in for servicing. Simply plug-in or plug-out.

DPChip is a universal format that allows it to be fitted to a large variety of engine types. Being fitted externally and downstream of your vehicles engine control unit (ECU), your DPChip is readily transferable to other EFI controlled diesel vehicles allowing you to tune your next vehicle cost effectively.

## Adjustability

The DPChip is pre-set. No adjustments are required.

The DPChip is adjustable to allow you to modify it to your individual needs.

Two methods of adjustment:

Manual adjustment - simply done via a pre-programmed power setting selector.

'Laptop Tuning' (all 3-Series DPChips) - this is a more detailed fine tune that can alter many more parameters and is often used with specific applications such as towing or when enhancing the performance in conjunction with larger intercoolers, exhausts, induction units etc.

## Up to 35% More Power & Torque! Up to 10% Better Fuel Economy!

- **Plug & Play.** Fits easily and quickly for instant power. No complex wiring looms. Can be simply unplugged to return vehicle to standard power output and condition.
- **Safe Downstream Installation.** ECU is untouched. All error detection systems and engine operational safety systems remain intact. DPChip cannot harm the vehicles ECU.
- **Optimises the entire engine map.** Independently alters timing and fuel to obtain the best possible balance between power gains and optimum durability.
- **Portability between vehicles.** Each DPChip model covers a large range of vehicles. If you sell your vehicle simply unplug DPChip and install in your next EFI controlled vehicle.
- **World's largest range** of EFI diesel tuning modules. Over 1200 vehicles supported and growing.
- **Fully shielded wiring harness** protects vehicle electronics and prevents electrical system interference to radios and other devices.
- **Manual and Laptop Tuning.** Only DPChip allows you to fine tune your vehicle to your specific needs. This can be carried out when you first purchase your DPChip or at a later date. Contact your local DPChip dealer for details.

**5 year warranty!**

For more information please ask your authorised distributor listed below or telephone on **(02) 48771022** email [info@dpchip.com](mailto:info@dpchip.com) or visit our website. Our sales team are always happy to help with any questions you may have.
